Share your love with personalized valentine's cards

If you are looking for something different and very unique for your special valentine, here are some great ideas! Download these FREE templates for a variety of cards that can be personalized and embellished to make them your own. Choose a nostalgic card with a custom envelope, a simple folding card that you personalize and fit into a standard notecard envelope, or other unique styles.

Materials Suggested:

- Epson Matte Paper Heavyweight (A4) or Epson Double-Sided Matte Paper (A4),
- Craft scissors
- An Epson Stylus Photo Printer.

Step 1: Click on the selected pages to open as .jpgs, or import into your preferred layout or photo editing program.

Step 2: Add text. Personalize your valentines by typing your message on the front and on the inside files.

Step 3: Your personalizing is complete! Print your cards. Remember to choose the correct paper size and paper type setting in your printer driver.

Step 4: Open or import the matching envelope file (for the cherub valentine) in .jpg format. (The other valentines will fit into a standard notecard envelope).

Step 5: Print your envelope. Remember to choose the correct paper size and paper type setting in your printer driver. Using the white lines as a guide (solid lines for trimming and dotted lines for folding), cut and fold your envelope.

Step 6: Embellish your valentines if desired.
