“A Year in the life of Rino”

1st May 2007

A Year I the Life of Rino

Contents

The following list summarizes the content of the exhibit

- 1. General Introduction**
- 2. Materials and Equipment / Tools Used on the project**
- 3. Formation and Layout of the Scrap Book**

A year in the life of Rino

General Introduction

The subject of the scrap book describes the life and some of the key events during the past year of our son Rino.

Rino is 6 years old and is a student at the Immanuel College in Adelaide, he is extremely intelligent and has particular interests in Music, Computers, and Martial Arts and would you believe scrap booking and crafts. He often participates in on his own little projects using many of the materials and equipment in my work studio.

The following exhibit is focused on the life of Rino last year and reflects many of the key activities he was engaged in.

Materials and Equipment Used

Materials Used

Basic grey cardstocks
Cardboard
7 different ribbons
Large and Small magnets
Stickers
Embellishment from EK Success
Epson Premium Glossy Photo Paper
Small chip board arrows
Tim Holtz Ranger distress ink

Tools used:

Epsom Picture Mate 500
Computer
Provo Cricut Tools
Craft cutter and ruler
Paper trimmer and Scissors
Double sided tapes and glues

I like to participate and be involved in the development and the different activities my son encounters in school.

As a result I always take my camera with me to capture these unique moments.

I would like to share as many of my pictures with you and have decided to use my Epsom Picture Mate 500 to produce the prints in ID photo size to fit the layout enabling me to group them accordingly. My Picture Mate 500 is also useful to print off from the computer allowing me to make titles and borders to match the pictures. This is also used to format the pictures as part of the basis to which the templates are produced which in turn is translated into mini booklets incorporating magnets and so on as can be seen from the following text

A year in the life of Rino

Formation and Layout of the Scrap Book

Front Cover and Back of the Front Cover Lay out

To make the cover I used a combination of two 12in x 12in blue cardstock and a cardboard

Cut two, 8 3/8in x 12in blue cardstock paper and one 8 3/8in x 12in cardboard. Insert the cardboard between the blue cardstock.

Front Cover Layout

Use one of the 8 3/8in blue cardstock

Punch 3 set of 3 ribbon hole.

Run a ribbon 3/4 in off the left side half way down. Lay the title "A year in the life of Rino". Run an orange ribbon under the words – year, life and Rino. Tack the end with a double sided tape between the blue cardstock and the cardboard and fold the other end with a double sided tape. When done continue with the ribbon vertically down on the left side to finish this off and put your finishing touch to complete the front cover.

Back of the Front Cover Layout

Use one of the 8 3/8in blue cardstock and cut a strip of 2 3/4 in x 12in patterned paper and adhere to the left side of the layout. Later on, run a piece of thin orange ribbon along the edge of the patterned paper right side.

Cut a piece of cardstock 6 3/4 in x 29cm and fold to three equal columns (2 1/4 in x 29cm). Vertically in the middle of the 29cm first fold, cut a small line enough to pass a ribbon and back. Stick a magnet between the two columns and adhere together. Stick a magnet at the back of the third column. Title and ID photos in front, more photos inside. To be mounted on the 2 3/4 in x 12in patterned paper above,
